Who We Are

THOR Construction started the concrete division over a decade ago as a logical response to controlling schedules by self performing work. In that time, we have successfully established self performed work into performing concrete work as a specialty subcontractor. As a General Contractor, THOR firmly believes that the critical task in beating and maintaining schedules is the ability to directly control elements of the structure and site work. Additionally, projects benefit from a GC that self performs work in the form of increased safety, and quality control. As a concrete subcontractor, THOR is able to bring this same drive and understanding to your project.

THOR prides itself with the diverse portfolio of projects we have constructed over the past decade. Further, we pride ourselves on quality, performance and price. By bringing General Contractor talent to your subcontractor team, THOR is up to the task of any project, regardless of size, location or schedule.

Whether performing Architectural Concrete, structural concrete, tilt-ups, mid rise structures or civil work, THOR's team is up to the challenge.

Notable Projects
